DETAILED ACTION

1. Claims 19-22 are pending in this application.

Response to Amendment

2. Applicant's amendment filed 1/23/2006 in response to the previous Office Action (11/28/2005) is acknowledged. Obviousness-type double patenting rejection of claims 19-22 has been maintained.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 19-22 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,750,215. Although the conflicting claims are not identical, they are not patentably distinct from each other because there is significant overlap between the instant claims 19-22 and claims 1-8 of U.S. Patent No. 6,750,215 when formula (I) in claim 19 of the instant application has the following substituents:

G = groups selected from (a) – (g); B = (CH₂)_mY where m = 1-3 and Y = CH₂; A = CH₂, NH, O, S, SO or SO₂; R₂ = aryl or heteroaryl, R = H, alkyl, alkenyl, alkynyl, aryl or aryl-alkyl; and R₁ = H, alkyl, alkoxy, OH, halogen or CF₃.

Response to arguments

Applicant's argument filed 01/23/2006 has been fully considered but it is not persuasive.

Applicants have filed a terminal disclaimer (TD) to overcome the rejection, but the terminal disclaimer is defective. The office disapproved the terminal disclaimer, because it does not indicate what is disclaimed. The U.S. Patent No. 6,750,215 is missing from the TD.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
